

Angle 1 — Image Guide: Maternity/Education Gap

Platform specs:

- Feed: 1080x1080px (square) or 1080x1350px (portrait — takes more screen space, recommended)
 - Stories/Reels: 1080x1920px
 - Link ad (if using website): 1200x628px
 - All images: RGB colour, JPG/PNG, max 20% text overlay (keep text minimal in image)
-

Creative Concept 1 — Variant A (Existing Ad)

Emotional Direction: Warmth + Practicality + Zero Anxiety

Image Description:

A warm, natural-light photo of a prepared nursery OR a smiling couple (or mother alone) holding a small pile of baby items (onesies, baby shoes, blanket). Soft, uncluttered setting. Real-feeling, not stock-photo stiff.

Recommended Stock Photo Search Terms:

- Shutterstock/Unsplash: "Singapore parents nursery", "pregnant couple home singapore", "baby shower preparation Asia"
- iStock: "Asian pregnant woman relaxed home"

AI Image Prompt (Adobe Firefly / DALL-E 3 / Midjourney):

"A warm, natural light photo of a young Asian couple sitting on the floor of a tidy nursery in Singapore, surrounded by neatly folded baby clothes and a checklist. They are smiling and relaxed. Soft beige and mint green tones. Lifestyle photography style, no text."

Text Overlay (keep minimal):

- None preferred — let the headline in the ad do the work
- Optional: Small badge in corner: "FREE DOWNLOAD" in white on mint green circle

Colour Palette:

- Background: Soft white (#FFFFFF) or warm beige (#FAF7F0)
- Accent: Mint green (#B5EAD7), Blush pink (#F7CAC9)
- Text (if any): Deep navy (#1C3557) for high contrast

Canva Template Search:

- Search "baby checklist" or "pregnancy guide" in Canva templates
- Remove all existing text, replace with your minimal overlay
- Export as PNG at 1080x1350px

Creative Concept 2 — Variant B (Education Shock)

Emotional Direction: Wake-up call + Authority + Data credibility

Image Description:

Split-frame or layered design. Left half: warm photo of a newborn or parent holding baby. Right half: clean white panel with bold black stat text. Simple, editorial feel.

Right Panel Text Layout:

University in 2043?

S\$300,000+

(for one overseas degree)

Only 45% of SG parents
feel prepared.

Text Styling:

- "S\$300,000+" in large bold serif font (e.g., Canva's "IM Fell English" or "Playfair Display")
- Font size: 72–96pt for the dollar amount
- Supporting text: 24–32pt, regular weight
- Colour: Deep navy text on white background

AI Image Prompt (left half photo):

"Close-up lifestyle photo of an Asian newborn baby sleeping peacefully wrapped in a soft white blanket, warm natural light, blurred soft background, photorealistic, no text"

Canva Build Instructions:

1. Create 1080x1080px canvas
2. Split 50/50 with a dividing line
3. Left: Insert baby photo
4. Right: White rectangle, add text as above
5. Source citation in small text at bottom: "(Source: University fee projections, insurer calculators)"

Colour Palette:

- Photo side: Natural warm tones
- Data side: White (#FFFFFF) background, Navy (#1C3557) text, Gold (#F4A847) accent for dollar amount

Creative Concept 3 — Variant C (Guilt Reframe)

Emotional Direction: Social proof + Relatable + Non-threatening

Image Description:

Lifestyle photo of a parent (mother OR father — test both) at a kitchen table or home office, looking at laptop or phone, with a baby nearby (in bouncer, playmat, etc.). Everyday Singapore home feel. Normal, relatable.

Text Overlay:

S\$1.8 BILLION
spent on tuition in Singapore last year.

Is YOUR child's
university fund keeping up?

[DOWNLOAD FREE GUIDE]

Design notes:

- Use a semi-transparent dark overlay on the bottom third of the photo for text readability
- Stat ("S\$1.8 BILLION") in large, bold white text
- Source citation: "(Straits Times / Household Expenditure Survey 2023)"
- Button-style CTA at the bottom: White text on navy rectangle

AI Image Prompt:

"Candid lifestyle photo of a young Asian mother working on her laptop at a kitchen table, her 6-month-old baby playing in a bouncer nearby. Natural light from window, modern Singapore HDB home interior, warm tones, photorealistic style"

Canva Build Instructions:

1. 1080x1350px canvas (portrait for feed)
2. Full-bleed photo (top 70%)
3. Dark gradient overlay (bottom 40%): Black at 60% opacity

4. White text layered on gradient
5. CTA rectangle: Navy with white text at bottom

Creative Concept 4 — Variant D (Urgency/Emotional)

Emotional Direction: Pure emotion, minimal text, maximum scroll-stop

Image Description:

Extreme close-up of newborn baby feet or hands — universally emotional image. Almost no text overlay. The emotion does the work.

Minimal Text Overlay:

18 years go fast.

[Download your free Baby Starter Pack]

Font: Clean sans-serif (Montserrat or Lato), white, minimal size

No stats needed — this one works on pure emotion

AI Image Prompt:

"Macro close-up photography of newborn baby feet held in parent's hands, soft white background, warm natural light, high quality photorealistic image, no text"

Video Creative Option (Reel / Story)

Recommended for Angle 1 if budget allows:

A 15–30 second "slideshow-style" Reel in Canva:

- Slide 1 (2 sec): "Expecting in 2026? This is for you." — white text on pastel background
- Slide 2 (3 sec): Baby photo + "Free Baby Starter Pack" title
- Slide 3 (3 sec): Checklist icons appearing one by one: "Hospital bag ✓ Baby essentials ✓ Cost guide ✓"
- Slide 4 (4 sec): The stat: "University fees up every year since 2010. What will it cost for YOUR baby?" + rising graph animation
- Slide 5 (2 sec): CTA: "Download Free — Link in Bio / Click Below"

Canva Reel tool: Use "Canva Video" → presentation format → add transitions → export as MP4

Background music: Canva royalty-free library → search "soft uplifting" → 15 sec track

A/B Testing Creative Notes

- Test square (1080x1080) vs portrait (1080x1350) — portrait typically gets more feed real estate and higher CTR
- Test photo of baby vs photo of parent vs data-heavy text graphic — data graphic often performs surprisingly well in financial contexts
- Test warm tones (blush/mint) vs clinical white/navy — warm tones work better for maternity angle; clinical works better for data-shock variants
- After 500 impressions per creative, pause underperformers and double budget on winner
