

Angle 3 — Image Guide: Mid-career Financial Confidence Gap

Design Principle: This audience (28–42) is digitally literate, ad-savvy, and has seen every type of financial marketing. Creatives must feel like smart content they'd save and share — not a traditional FA ad. Bold, data-forward, editorial. Think LinkedIn posts, not insurance brochures.

Platform specs:

- Feed: 1080x1080px (square) or 1080x1350px (portrait — recommended)
- Stories/Reels: 1080x1920px
- Link ad: 1200x628px

Creative Concept 1 — Variant A (60% Stat Card)

Emotional Direction: Identity validation — "You are not alone"

Image Description:

Pure typography on dark background. No photos. Looks like a thought-leadership Instagram post that could go viral. The goal is scroll-stopping with a single number.

Layout:

Colour Palette:

- Background: Deep charcoal (#1C1C2E)
- "60%" — Electric teal (#06D6A0), very large (120pt+)
- Body text — White (FFFFFF), 18–22pt
- Source citation — Grey (#9CA3AF), 12pt
- Divider line — Amber (#F4A261), 1px
- CTA — Teal (#06D6A0), 14pt

Typography:

- "60%" — Bebas Neue or Montserrat ExtraBold, no leading
- Everything else — Inter Regular or Poppins

Canva Build Instructions:

1. Dark charcoal canvas (1080x1350px)
2. "60%" text element: full-width, centred, teal, massive
3. Subtext: white, 18pt, max 4 lines
4. Citation: grey, 12pt
5. Thin amber horizontal rule divider
6. CTA text below: teal

AI image: Not needed — pure typography

Creative Concept 2 — Variant B (Crossed-Out \$1M)

Emotional Direction: Pattern interrupt + Intellectual curiosity + Personalisation hook

Image Description:

Clean white or very light grey background. A large dollar amount with a red strikethrough. Disruptive and thought-provoking. Looks like a whiteboard concept from a smart presenter.

Layout:

Colour Palette:

- Background: White (#FFFFFF) or very light grey (#F5F5F5)
- "S\$1,000,000" — Dark navy (#1C1C2E), bold, very large
- Red strikethrough — #EF233C (bold, thick line through the amount)
- Body text — Navy (#1C1C2E), standard weight
- Stat callout — Teal (#06D6A0) accent box
- CTA — Navy rectangle with white text

Canva Build Instructions:

1. White canvas
2. Large "S\$1,000,000" in centre, dark navy
3. Red rectangle (line) overlaid at slight angle as strikethrough
4. Body text below
5. Small teal-bordered box with the T. Rowe Price stat
6. CTA strip at bottom

Creative Concept 3 — Variant C (Burnout Reel)

Emotional Direction: Pain recognition + Hope + Urgency

Format: This works best as a short video Reel (15s) or an animated text card sequence. Can also be static if video is too complex.

Text Card Sequence (15 seconds):

Frame	Duration	Text	Design
1	3s	"Working harder than ever."	White text, dark BG
2	3s	"Still feel financially behind."	White text, dark BG, slow fade
3	3s	"Under-40s in Singapore are 3x more likely to be extremely burnt out."	Teal stat text
4	3s	"Most of them don't have a number."	Amber text, bold
5	3s	"Find yours free → Freedom Number Audit"	CTA, teal + arrow

Audio: Lo-fi background beat, minimal. Or no audio (many people watch on mute).

Canva Video Build:

1. Use "Video" mode in Canva
2. 5 text card "pages" with auto-play transitions
3. Each page: 3 seconds display
4. Transitions: Simple fade or cut (no animations — keeps it clean)
5. Export as MP4, upload to Facebook as video ad

Static alternative (if video feels complex):

- Single dark image with the "3x" stat large + "What most don't have... is a number." + CTA
- Run as 1080x1350 static image in feed

Creative Concept 4 — Variant D (Cost of Living Context)

Emotional Direction: Environmental validation + Data authority + "You're not imagining it"

Image Description:

Split infographic. Left side: Singapore facts (cost data). Right side: The solution hook. Feels informational, like something you'd share with a friend who's questioning why they feel financially stressed.

Layout:

Colour Palette:

- Left panel: Charcoal (#1C1C2E) background, white and red (#EF233C) text for stats
- Right panel: Teal (#06D6A0) background, dark navy (#1C1C2E) text
- Divider: Thin amber line

Canva Build Instructions:

1. 1080x1080 or 1080x1350 canvas
2. Two equal rectangle panels
3. Left: dark, stats in white with red accents
4. Right: teal background, solution text in navy
5. Vertical amber divider line
6. Source citations in grey at very bottom

Tools and Workflow Summary

Step	Tool	Notes
Design all creatives	Canva Pro	Use brand kit for consistent colours/fonts
Generate lifestyle photos	Adobe Firefly	Best for Singapore-contextual images
Generate photos	DALL-E 3 (ChatGPT)	Good for realistic lifestyle shots
Stock photos backup	Unsplash	Search "Singapore professional"
Animate text cards	Canva Video	15-sec Reel export
Compress images	TinyPNG	Keep under 1MB for fast loading
Create QR codes	qrcode-monkey.com	For WhatsApp link in offline materials

A/B Testing Priority for Angle 3 Creatives

Creative	Format	Test Against	Success Metric
60% stat card (Variant A)	1080x1350 static	Run first as control	CPL
Burnout Reel (Variant C)	15s video	Test vs Variant A	CPL + lead quality
\$1M Myth (Variant B)	1080x1350 static	Test after A/C	Lead quality (higher CPL expected)
Cost of Living (Variant D)	1080x1080 static	Secondary test	Engagement rate

Golden rule: Run at minimum 2 variants at all times. Kill anything with CPL >3x your best performer after 500+ impressions per variant.

Cross-Campaign Brand Consistency Notes

While Angle 3 has a distinctly different visual language from Angles 1 and 2, maintain these consistent elements:

- **Logo placement:** Bottom right, same proportional size across all campaigns
- **Disclaimer text:** Same wording, same small grey font, always present
- **Your name:** Visible in every creative (builds personal brand recognition)
- **WhatsApp number:** Included on all image creatives where space allows
- **CTA arrow style:** Consistent "→" or ">" treatment across all angles

The visual differentiation (warm/soft for Angle 1 vs authoritative for Angle 2 vs bold/modern for Angle 3) is intentional. Audiences who see multiple campaigns will not perceive it as inconsistent — they'll subconsciously recognise the range of situations you cover.
